

## Rocklin family faces dual battle with cancer.

---

Where does one turn when life's challenges seem insurmountable? For the Bresnyan family of Rocklin, that question has been answered as two of the Bresnyan children, Melana and Nick, are fighting two different types of cancer.

First Nick, 26, was diagnosed with malignant brain tumors, and two tumors in his spine. His cancer is a reoccurrence of Germinoma Brain Cancer, which he battled nine years ago. The treatment he receives is extremely painful, but the doctors are reasonably sure that it will cause his cancer to go into remission long term. Nick is very determined to beat this and get back to work and life.

Melana, 19, a graduate of Rocklin High School in 2007, was diagnosed with Hodgkin's Lymphoma February 8, 2008. She is currently undergoing chemotherapy treatments twice monthly and will continue for four to six months.

"Our family is going through some pretty deep and turbulent waters right now and even though modern medicine has come a long ways in cancer cures, much of it is still a best guess. So we are mostly encouraged by our creator God, who stills the tempest waters swirling around us and gives a calm that is just miraculous."

-Dave Bresnyan

*Melana and Nick Bresnyan*

The Bresnyans are an incredible family. They are facing this battle with a strength and calm that is made more remarkable in light of the fact that Dave Bresnyan was recently laid off of his job as a construction superintendent, and the family faces mounting medical bills only covered in part by COBRA.

If you believe that God often works through the sincere efforts of His people, Please prayerfully consider partnering with us by providing a financial contribution to the Bresnyans through the web link listed below.

Thanks & God Bless!
